

Stop Hepatitis B and Get Tested Today.

Did you know:

- San Francisco has the largest Asian American population in the U.S.
- 1 in 10 Asian Americans has Hepatitis B.
- 1 in 4 who are infected may die of liver cancer.
- The only way to know for sure is to get a simple blood test.

There is a safe vaccine that prevents Hepatitis B. If you have already have Hepatitis B, there are treatments. Protect yourself, your loved ones, your community. Get tested today.

The best place to be tested is at your doctor's office.

If you do not have doctor or insurance, you can go to these places listed below. You do not need an appointment.
